COMPETITOR 1	COMP 2	COMP 3	**ALTARO**

Augmented Inline Deduplication already far outperforms our nearest competitors

SOME COMMENTS
OUR V7 CUSTOMERS SHARED WITH US

"The first week after upgrading from v6 to v7 I couldn't believe the results on the dashboard, it went so fast that I assumed something was wrong. It wasn't. The improvement in time and data by using the new deduplication method is really tremendous! I've been using Altaro since v4 and this is the best upgrade ever! Thank you, Altaro Team!"

"v7 Has made my backup jobs take about a third the time that the previous version took. And being a company that has a fairly slow backup device this helps tremendously."

"Works great. Much faster than before. We have a few customers with more than 90% backup storage saving with the inline deduplication"
